

# ID5: Retrospective

- **"How do you feel the deliverable emerged overall?"**
  - We finished most of the features and tasks that we were supposed to do
  - We have 80% coverage of test without encountering the Playwright tests, acceptance tests and some of the System and Integration tests
  - We are happy with the project state and we had a "soft landing".
- **"What actions/practices helped our progress in producing a quality deliverable?"**
  - Pair Programming
  - Having lots of discord activity and people were involved in many of each others activities which let everyone to be up to date on what are the things that needs to be done
  - Having 3 meetings with stakeholder and letting him work with the website and provide us with feedback on places that needs to be improved, increases the quality of the final product
  - Planning poker and having an immediate meeting to assign the tasks
  - The freedom of assigning people to different teams according to their availability
- **"What actions/practices hindered our ability to produce a quality deliverable?"**
  - Time constraints
  - Having imminent due dates for other classes assignments/ projects
  - Misunderstanding in requirements (user profile page)
- **"What process innovations or steps could we have taken that would help us the group do even better"? /What can we do have done better?**
  - Having a Plan for doing the bug party in advance
  - Starting the tasks sooner

- Making more people to use the stand up report
