

ID4: Retrospective

- **"How do you feel the deliverable emerged overall?"**
 - Overall went pretty well for both QA team and dev team, a lot of testing done and backend testing setup
 - A bit of issues on local environment regarding prettier
- **"What actions/practices helped our progress in producing a quality deliverable?"**
 - We had better communication this time and was able to assign and get started tasks earlier
 - Our estimation got better
 - We assigned the right amount of work based on our team velocity
 - We rekindled our momentum back in this deliverable
- **"What actions/practices hindered our ability to produce a quality deliverable?"**
 - It would have been great to get our ID feedback earlier than later so we can plan and take actions sooner
 - We need UAT requirements inside issues to help write tests for our issues and this should help us practice better TDD
 - Some issues are not getting done by the due date
- **"What process innovations or steps could we take that would help us the group do even better next time"? /What can we do better next time?**
 - We need to plan meetings ahead of time instead of expecting same day meetings
 - Writing UAT requirements for issues will help give context to our work
 - Setting hard deadlines for certain issues if it is an issue that has a lot of blockers

- We need to implement deadlines for issues and have an extremely detailed of summary of their work. These consist of everything you have done so far for the issues, how much tasks you need to do left, do you think you will be able to finish by x date, and are you having troubles and need any help?
- Make sure to ask questions and don't struggle by yourself
