

Code Inspection Checklist

Java & Typescript

General Review

Checklist

Reviewer: Eric Buell

Reviewed File: PredictedDataPage

1. Variable Declaration

- ☒ Are variable names informative
 - Yes
- ☒ Are variable names unique (not confusing or similar)?
 - Yes
- ☒ Are variable names following chosen capitalization conventions (camel case)?
 - Yes
- ☒ Are variables properly initialized?
 - Yes
- ☒ Are variables labelled as private or public based on their use?
 - N/A
- ☒ Is every declared variable used?
 - Yes
- ☒ Is there excessive use of unnecessary temporary variables?
 - No

2. Methods and method signatures including return and input types

- ☒ Do method names reflect method functionalities?
 - Yes
- ☒ Do method expected return values match the intended use of the return value?
 - N/A

- ☒ Do methods have safeguards for problematic/unexpected input?
 - N/A
- ☒ Is there a high cohesion between the methods within the same class?
 - N/A

3. Control flow Defects

- ☒ Are Switch cases used instead of if/else blocks when appropriate?
 - N/A
- ☒ Are While loops successfully terminated to avoid infinite loops?
 - N/A
- ☒ Are control flows used efficiently in the handling of erroneous input?
 - N/A
- ☒ Are loop variables declared properly so that their scopes are only as big as necessary?
 - N/A
- ☒ Are there checks for edge cases (out of bounds) for For loops?
 - N/A
- ☒ Are there else blocks used for every if condition to ensure no case goes unhandled?
 - N/A

4. Code style & practices

- ☒ Is code consistently indented, spaced, and formatted?
 - Yes
- ☒ Code is well documented using inline comments and docstrings.
 - No - no comments at all although currently it is not hard to know what is happening without them
- ☒ Are Expensive operations minimized (shallow object copies replacing deep ones if possible)
 - Yes (possibly N/A)
- ☒ Are generics used where possible to improve code readability & reduce complexity?
 - Yes

Typescript Review Checklist

- ☒ Are type annotations and inference used?
 - NA
- ☒ Are strict Null checks in place?
 - N/A

Use type inference, type annotation, and generics.

Rollbar Review Checklist

- ☒ Is Rollbar being used consistently?
 - N/A

Front End (TS & ReactJS)

- ☒ Is the single responsibility principle applied to react components?
 - N/A There are no components for currently just rendering a page
- ☒ Are container components used strictly for managing state and business logic?
 - N/A
- ☒ Are presentational components used for UI rendering and logic strictly?
 - Yes
- ☒ Are related components, styles, and assets grouped within same directory?
 - Yes
- ☒ Are functional components used instead of class components if possible?
 - N/A
- ☒ Are React hooks used to manage & control state & effects in functional components?
 - N/A
- ☒ Are hooks called at the top level of functional components?
 - N/A
- ☒ Are unnecessary re-renders avoided?
 - Yes
- ☒ Are local component states prioritized for UI-specific state matters?
 - Yes

General Additional Notes:

Currently there is no logic so there was very little to inspect
