

ID4: Meetings with stakeholder Documentation

Meeting With Stakeholder

Meeting notes for March 6th

March 6th, 2024 ⇒ Meeting with Stakeholder

☒ ~~Ardalan Askarian~~

☐ Daniel Benesh

☐ Ralph Gregorio

☒ ~~Glenn Tanjoh Jong~~

☐ Juan Arguello Escalante

☐ Eric Buell

☐ Cameron Beattie

☐ Jozua Villegas

☐ Kamal Zrein

☐ Marcus Kruger

Discussed the following topics:

Deletion of Data:

For any user (regular or the researcher) after they delete an item, it will not be deleted and will be kept for 30 days (user will get a pop up about this so that they know they can recover it). Also, the data will be never be deleted from the system like it will always will be kept if the user did not delete it.

Researcher vs User

Researcher:

Can upload data from a certain number of people at a time.
Has the ability to perform batch uploading, processing, and predicting.

Other Notes:

Currently, there is no batch processing code available in the backend (of moderate importance).

Profiles:

Simple profiles to allow users to view the data they uploaded.

Account Management

Users also have the following options:

Change their password

Delete their account, including all data added to the web app.

Meeting notes for March 13th

March 13th, 2024 ⇒ Meeting with Stakeholder

- ☐ Marcus Kruger

Project Manager could not attend the meeting to an emergency matter. If you have any questions please let me (Project Manager) know.

Stakeholder meeting with Dr.Fuller

How important is the profile feature? ***Not until all pages are functional***

What would that consist of exactly?

Change password

Remove my data feature(All data that has gone into application)

Delete my account (Everything)

Download all data(All data that has gone into application)

What links should be on the homepage exactly? ***Privacy policy and About us only, keep it simple***

Can we get text for the About us section? ***Will send***

Can we get text for our slide on the Login page? ***No need, Comfortable with what is on there at the moment***

We are removing the delete button on the File Upload page, agreed?

Would love a delete button to remove just from the html but not actual data. If user wanted to, they would in the profile section.

We explained we will do what we can because that is a bit of a complex task but we are having a time constraint

Should there be a homepage and a landing page? ***No, just one. Thus, scrap home. Leave Landing page. Keep it simple***

Functional Pages is priority number one

And after....

Run tests for speed and stability
